

## MobilePallet Goods-To-Person Pallet Automation

**PRIME**  
robotics  
accelerate your business

### Easily Transport 4,400 Pounds!

Prime Robotics MobilePallet solution is the premier American-made AMR for moving pallets around your Warehouse, E-Commerce or Distribution facility. Built like a tank, MobilePallet robots are the most efficient, durable, and fast-moving goods-to-person robots on the market. With an ability to transport up to 4,400 pounds of product, MobilePallet is the preferred solution for heavy and mid-weight pallet transportation.

MobilePallet dramatically increases productivity by reducing the number of human touches required once a pallet arrives at a warehouse. Trucks can unload faster, Pallets can move inventory faster, human error and forklift crashes become obsolete, and risk of work-related injury is dramatically reduced.

### Automation Benefits

#### SAVE TIME

- Load and unload trucks faster
- Sequence movements for efficiency
- Humans Can Focus On Complex Projects

#### REDUCE LABOR

- Move pallets without humans, 24/7
- Fewer Forklift drivers needed
- Fewer pickers needed

#### SCALE & CUSTOMIZE

- Automate more areas seamlessly
- Scale and grow as needed
- Increase velocity to meet deadlines

*"Pallet operations can be made much nimbler through the use of MobilePallet robots. Combining Prime's tank-like robots with software tailored for pallet operations, you can do more with fewer people."*

*-Eric Rongley, CEO Prime Robotics*

### Software - Simple & Intuitive

Our proprietary software is built specifically for warehouse automation management. We can integrate with any WMS, and using the system takes less than an hour to learn. With Floor Manager you can view a status of active map, reconfigure map layout, recover errors, direct robots and so much more.

Workflow Builder, a core feature within Prime Robotics Software enables users to alternate inbound processes, adapt seamlessly with ship and packing processes, and allows for configuring of license plates on delivery totes. It is simple, intuitive, and includes a drag and drop interface to help you create dynamic workflows to fit your business.

### MobilePallet - Product Specs

Robot Model - MP-3300

Drive Power - Lithium Battery

Speed - 4 MPH

Collision Avoidance - LIDAR

Weight - 957 pounds

Load Capacity - 4,400 pounds

Dimensions - 50" x 40.2" x 14.1"

Drive Time - 10 hours

Batter Charging - 1.5 hours
