

MobileShelf Goods-To-Person Shelf Automation

PRIME
robotics
accelerate your business

Efficient. Productive. Scalable.

Prime Robotics MobileShelf solution is the premier American-made shelf-moving AMR for your Warehouse, E-Commerce or Distribution facility. Fast and productive, users can improve warehouse productivity by up to 1000%. With MobileShelf, you can dramatically reduce the amount of time needed for inbound and outbound, while simultaneously reducing unnecessary overhead labor costs.

MobileShelf dramatically increases productivity by reducing the number of human touches required once your products have arrived at a warehouse. Fully customizable and scalable, MobileShelf can adjust its shelf and slot count to maximize space for all your warehouse needs.

MobileShelf Benefits - Achieve up to 250 Picks Per Hour!

SAVE TIME

- Inbound & outbound 10X faster
- Sequence movements for efficiency
- Humans Can Focus On Complex Projects

REDUCE LABOR

- Move products without humans, 24/7
- Fewer Pickers needed
- Fewer errors realized

SCALE & CUSTOMIZE

- Automate more areas seamlessly
- Scale and grow as needed
- Increase velocity to meet deadlines

"Just as the new warehouse was opening up and I was turning on the Prime Robotics MobileShelf system, COVID-19 hit. Online sales went through the roof and I had no way to hire additional labor. After 2 weeks, MobileShelf helped me scale from 1 to 1,000 orders daily. The cost and deployment was easy, so it was hard for me to comprehend why I didn't make the transition years ago."

-Eugene Khorosh, Founder & President, McDonald Paper

Software - Simple & Intuitive

Our proprietary software is built specifically for warehouse automation management. We can integrate with any WMS, and using the system takes less than an hour to learn. With Floor Manager you can view a status of active map, reconfigure map layout, recover errors, direct robots and so much more.

Workflow Builder, a core feature within Prime Robotics Software enables users to alternate inbound processes, adapt seamlessly with ship and packing processes, and allows for configuring of license plates on delivery totes. It is simple, intuitive, and includes a drag and drop interface to help you create dynamic workflows to fit your business.

MobileShelf - Product Specs

Robot Model - MS-1100

Drive Power - Lithium Battery

Speed - 5 MPH

Collision Avoidance - LIDAR

Weight - 331 Pounds

Load Capacity - 1100 pounds

Dimensions - 35.75" x 28" x 12.1"

Drive Time - 8 Hours

Battery Charging - 2 Hours
